TRANSITIONAL DESIGN

Bridging classic design with modern elements, the transitional design trend continues to hold sway due to its versatility and ability to suit any taste. The Fonteyn collection transitions between the timelessly refined design of the 1940s and 50s to the bold retro aesthetics of the 1960s. As a coordinated collection, Fonteyn brings these styles together through sculptural curved forms, luxurious finishes, and intricate detailing in a fully coordinated design narrative.

BE INSPIRED

5-STAR HOTEL GLAMOUR

As homeowners seek more 'quiet luxury' for their interiors, there is a significant trend in borrowing from high-end hotel design to elevate the home environment. The Carlyle collection leads with this aspiration, blending understated luxury with refined detailing to offer a complete bathroom solution inspired by glamorous 5-star hotel living. Developed with a premium finish in mind, Carlyle range provides a compelling new proposition for those seeking timeless, beautiful design with modern functionality.

JEWELLERY INSPIRED LUXURY

Make a statement and add a touch of luxury to the bathroom with jewellery-inspired brassware textures and intricate details. From faceted glass surfaces to marble stone effects, we have incorporated this trend across mixer handles for our Bijoux collections: Isabel, Chiasso and Sestriere.

NORDIC MINIMALISM

Bold aspects and industrial forms define the latest Nordic Minimalism trend, in which restraint and expression sit side by side. The Studio 316 range encompasses a complete bathroom suite, blending Nordic minimalism with exceptional craftsmanship to give the trend for colour and texture a fresh, elegant twist. Accented with pops of colour, 316-grade stainless steel mixers and showers coordinate with vanity units, washbasins, a freestanding bathtub and accessories.

COLOUR & PERSONALISATION

Personalisation continues to shape bathrooms as homeowners and designers turn to expression and individuality. Colourful brassware is a big focus here and remains a key trend for 2026, with our durable Armour coating enabling bright pops of colour in the bathroom through the Toko Flavours and Studio 316 ranges. Personalisation also extends to the bespoke Alpine basin and countertop collection, which offers 19 finishes and can be paired with complementing Chiasso mixers for a one-of-a-kind look.

SUSTAINABILITY

As designers increasingly seek ways to reduce environmental impact, sustainable design choices are becoming increasingly essential. We support this shift by offering eco-friendly bathroom products such as touchless mixers that help reduce water usage. Many products, including the Studio 316 outdoor showers and mixers, are made from durable 316 stainless steel which is a sustainable choice that provides long-term value. Anti-corrosive, it is designed for both the interior and exterior and comes with a 10-year guarantee for peace of mind.

BIJOUX COLLECTIONS

Glamorously intricate with jewellery-inspired detailing, Bijoux emerges as the most decorated category in our mixer portfolio. Expertly made in Europe, these ranges captivate with their sculptural forms, exquisite Murano glass or stone-effect accents, and distinctive finishes – transforming functional brassware into striking design features for the bathroom.

ISABEL

Isabel transforms artisanal Murano glassmaking into a contemporary design statement for the bathroom. Designed to be admired, the collection takes inspiration from jewellery and fine perfume bottles; its octagonal, faceted surfaces encapsulate the elegance of a truly unique design.

CHIASSO

Combining fluting with natural stone, Chiasso is a contemporary collection of basin and shower mixers available in five versatile brassware finishes and 9 beautiful porcelain accent inserts. The inserts on the handles are customisable, with the opportunity to correspond with Alpine washbasins and countertops.

SESTRIERE

The perfect marble mixers to elegantly accent bathroom spaces. Produced in Italy beneath the cool shadow of the Alps, Sestriere features a sophisticated variety of two marble and four brassware finishes to elevate hospitality or residential bathroom projects to 5-star standards without compromising the design vision or budget.

Stylish staple components include shower columns, hand showers with multiple spray patterns and pressure settings, slide rail kits, and accessories. A more tailored, spa-worthy experience comes in the form of spa shower heads with soothing flow functions and mood-enhancing lighting, body jets that target specific muscles, and thermostatic shower columns for perfect temperatures.

For a closer connection to nature, outdoor showers are an invigoratingly practical choice. Constructed from Grade 316 stainless steel they guarantee lasting durability in weather-resistant finishes like Brushed Stainless Steel, PVD Oyste, Armour Cocoa and Armour Truffle.

All products are compatible with standard shower enclosures and bathtubs, while all thermostatic valves are WRAS-approved.

Stylish furniture and sanitaryware combine traditional craftsmanship and directional design with the latest in technological innovation to create a coordinating solution.

Designed in line with the latest global trends, our collections are created to complement a wide range of aesthetics. From the hotel-luxe Carlyle to the mid-century inspired Fonteyn, and the understated Japandi style of the Nara collection.

To suit any scheme from the master bathroom to the powder room, basins vary in countertop to freestanding styles; WCs and bidets are available in traditional to wall mounted; and design-led furniture options feature in multiple sizes, finishes and materials with countertops to complement. Furniture textures like richly veined marble, terrazzo and natural wood give visual interest beyond function.

Installed in many of the world's most prestigious hotels, restaurants, bars and residential developments, BAGNODESIGN basins are specified for their aesthetic, distinctive and highly durable qualities.

Feature washbasins are crafted from unique materials such as BAGNOQUARTZ, Murano glass, resin, solid marble and stainless steel. In addition, stylish ceramic basins, which range from countertop vessels to semi-recessed, wall-mounted undercounter versions in a choice of shapes and sizes.

A custom, one-of-a-kind addition is the modular Alpine basin and countertop collection, crafted on-site in our Slab Fabrication facility from a choice of 19 porcelain slab tiles and industrial-grade Wedi board, ensuring a durable design for even high-traffic washrooms.

Balance the look with countertops destined to host a double basin, as a shelving option, or as a stunning dressing room table.

The revolutionary MILK treatment system, made to pamper your skin, leaving it feeling fresh, clean, and moisturised.

Consisting of 100 percent pure water and zero additives, the MILK system is designed to deliver an unparalleled wellness treatment. Miniscule oxygen-rich microbubbles cover your skin like a silk blanket for a truly rejuvenating experience, boosting the skin's absorption of oxygen, while an infusion of negative charged ions, which research indicates can increase serotonin levels in the brain, provides a crucial boost to overall wellbeing.

The various marbles used have been chosen for their strong concentration of fossils and as they are a purely natural product, there will always be the presence of different variations of veins, colours and shades, as well as micro-cracks and small holes. This gives each piece the characteristic of being truly unique.

Designing the perfect walk-in shower is achieved through modern and sleek glass walk-in panels that define the area while shower and floor drains keep the look harmonious in a variety of styles, shapes and sizes.

Contributing to an open, light-filled space, shower panels offer flexibility in design, allowing for fully open enclosures or the option to install a door for added privacy. Complementing this design are shower and floor drains in various styles, shapes and sizes, ensuring a coordinating look with matching brassware. Alternatively, for a seamless pattern across the floor, we have options that maintain continuity.

Crafted from durable Grade 316 or Grade 304 stainless steel using advanced laser welding technology, our shower channels and floor drains are quick and easy to install, resistant to bacteria, easy to clean and anti-corrosive.

Improve washroom efficiency with a centralised multifeed soap supply system built for high-traffic environments. By combining the Multifeed Soap Dispenser System Kit with our reliable AQUAECO dispensers, this solution maintains a steady soap supply while lowering maintenance demands, ensuring a smooth, hassle-free experience for both end users and facility teams.

Designed for Busy Public Washrooms
Built to perform reliably in high-traffic environments, ensuring soap is always available, even during peak hours.

Streamlined Soap Supply
A single concealed -5litre container can supply soap for up to three dispensers, reducing refill points and improving back-of-house efficiency.

Rapid Refilling System
The top-fill system allows quick, mess-free refills with minimal disruption to washroom operations, making it ideal for facilities requiring quick maintenance turnaround.

Lower Maintenance, Lower Costs
Fewer refills mean labor time is reduced, servicing is more efficient, and long-term operating costs are significantly reduced.

ANTI-SCALD DEVICE

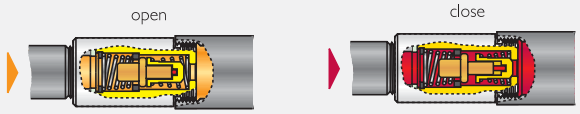

The anti-scald device will maintain a safe temperature of hot water for appliances, a must for young children, the elderly and those requiring care.

By installing this device, the risk of scalding will greatly be reduced due to the automatic temperature detection, ensuring that when the water becomes too hot, the flow of water will stop.

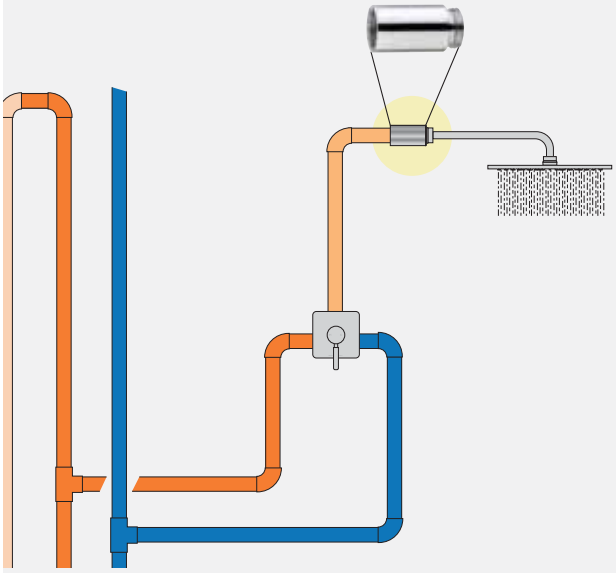

After reaching a safe temperature the device will re-activate and water flow will continue.

APPLICATIONS:

For Showers, Kitchen Mixers, Hospitals etc.

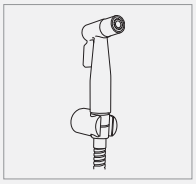

- Thermostatic temperature detector.
- Electroplated brass body.
- Water flow is blocked if temperature goes above 48°C.
- Self reactivation when the temperature decreases.

PRESSURE LIMITER APPLICATIONS

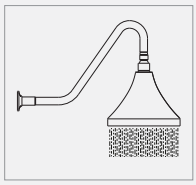

Bidet Sprays

- Protection against overpressure and water hammer
- May ease operation

Shower Heads / Hand Showers

- Protection against excess pressure load due to high pressure

HONEYCOMB Clinic Aerators

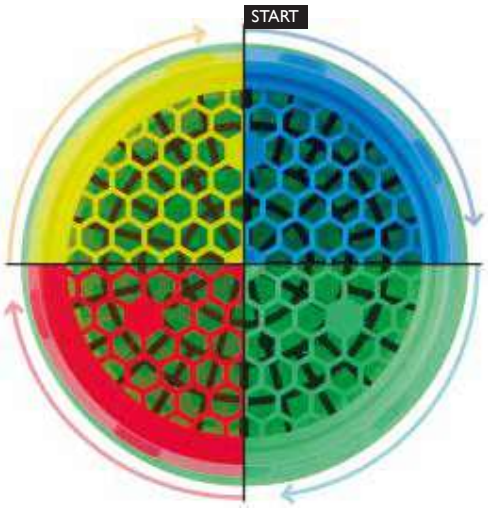

- The integrated flow limiter (Flow Class Z) ensures a constant water flow: 7.5-9 l/min @ 3 bar. This type of flow restriction makes a significant contribution to preventing unnecessary contamination as a result of water spray
- laminar stream
- only drinking water compliant materials used, as certified according to KTW (UBA), DVGW 270, etc.
- improved safety and hygiene thanks to an effective four-colour concept – each colour symbolises a replacement cycle. This means it is easy to recognise and monitor whether replacement is taking place regularly and correctly
- minimal spray and aerosol formation, therefore minimised risk of infection with waterborne legionella or pseudomonas bacteria

FOUR COLOURS, MORE SAFETY

- More safety and hygiene thanks to an effective four colour- concept; every colour represents an exchange cycle which makes it easy to recognise and monitor whether the replacement has taken place as scheduled.
- The exchange cycle needs to be set by the facility itself since the water and operating conditions have a huge effect on the microbiological potential contamination of the aerator.

Our portfolio of WC flushing solutions is built to the highest quality standards and offers unbeatable functionality. Concealed flushing cisterns create seamless, contemporary, easy-to-clean designs that reduce noise and water consumption with a built-in dual flush mechanism. Presenting an unmatched variety of designs, shapes and finishes to integrate into any bathroom scheme, our flush plates meet the highest aesthetic and functional expectations.

For close-coupled WCs, the flush mechanism is either included or required depending on the model. Simply add a bottom inlet, side inlet and conversion kit. Our flush valves are a hygienic solution thanks to a built-in touchless sensor. Sleek finishes blend with tiles and sanitaryware, while stainless steel is ideal for high-traffic environments.

We offer up to 10 years warranty on our flushing solutions.

FLUSHING SOLUTIONS

- **More space**: Since concealed cisterns are built into the wall, they free up a considerable amount of bathroom space that would otherwise have been taken up by the cistern.
- **State-of-the-art technology and durability**: The range of concealed cisterns boasts high-tech working parts to ensure trouble-free operation.
- **Design freedom**: Homeowners and designers can pair their choice of actuator or flush plate and wall-hung or floor-standing toilet pan to perfectly complement their bathroom's particular style and design.
- **Easy to clean and hygienic**: Concealed cisterns and wall-hung WC pans provide the ideal easy-to-clean and optimum hygiene solution – no obstacles to clean around or cisterns to clean under.
- **Good for the environment**: All cisterns contain a dual-flush mechanism, helping to reduce running costs by saving water – using as little as two litres of water for a half flush.
- **Noise reduction**: Since the cistern is built into the wall, any noise created by the process of flushing is significantly reduced, making this an ideal solution for en-suite bathrooms. This is also a key in any hospitality requirement.
- **Strength**: All cistern frames are designed and built to support up to 400 kg in weight.
- **Warranty**: All cisterns come with an impressive 10 year warranty.
